Art Unit: 1625

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) which are drawn to compounds, compositions and methods wherein R3 does not form a ring, R4 and R5 do not form a ring and Ar is phenyl.

Group II, claim(s) which are drawn to compounds, compositions and methods wherein R3 does not form a ring, R4 and R5 forms a ring and Ar is phenyl.

Group III, claim(s) which are drawn to compounds, compositions and methods wherein R3 does not form a ring, R4 and R5 forms a ring and Ar is heteroaryl.

Group IV, claim(s) which are drawn to compounds, compositions and methods wherein R3 forms a ring, R4 and R5 does not form a ring and Ar is phenyl.

Group V, claim(s) which are drawn to compounds, compositions and methods wherein R3 forms a ring, R4 and R5 forms a ring and Ar is phenyl.

Group VI, claim(s) which are drawn to compounds, compositions and methods wherein R3 forms a ring, R4 and R5 forms a ring and Ar is heteroaryl.

Group VII, claim(s) which are drawn to compounds, compositions and methods wherein R3.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

According to MPEP Section 1850 D, a Markush group must meet two criteria for unity of invention, i.e. (A) and (B) or (C). In the instant case, neither (B) or (C) is met

Application/Control Number: 10/542,044

Art Unit: 1625

since there is not <u>a significant structural element</u>, that is a large portion of the molecule or if the common portion is small it must be novel, which is neither the case here; or all the alternatives do not belong to a recognized class of chemical compounds (see the various heterocyclics, for example).

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: see the various non-het and hets.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: Claim 1, for example.

Application/Control Number: 10/542,044

Art Unit: 1625

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: see reasons above.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1625

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah C. Lambkin whose telephone number is 571-272-0698. The examiner can normally be reached on 9.00-5.30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas McKenzie can be reached on 571-272-0670. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
